FINISHES

Panda has numerous finish options available for our aluminum systems depending on the location, use, and weather conditions your project requires:

- **POWDER COAT AAMA 2604**

  Our standard powder coat finish, perfect for covered systems or those in milder weather conditions.

- **POWDER COAT AAMA 2605**

  A more durable powder coat finish that is great for applications with harsher weather conditions.

- **METALLIC/BONDED POWDER COAT**

  Metallic/Bonded Powder Coat is available in both AAMA 2604 and 2605 depending on your goals of weather resistance and durability.

- **ANODIZING/KYNAR/DURANAR**

  The longest lasting and most durable finish option we offer. Ideal for commercial applications and doors that receive frequent daily use.

If you would like a custom color to match another aspect of your home decor, please contact one of our Panda Representatives.
