**Panda French Doors** are available in single leaf and pair configurations. The doors are designed for a variety of projects types; from luxury homes & commercial buildings to high-rise hotels & condominiums.

### **Profiles:**

The profiles are made from a 6063-T5 extruded aluminum for maximum strength and durability. These sturdy extrusions are perfect for large, oversized openings. The custom designed bottom sill plate offers maximum weather resistance.

The doors are available with powder coat, anodize and Kynar paint finishes in thousands of colors options.

### **Accessories:**

There is a variety of standard and custom hardware to choose from such as pivot hardware and oversized hinges for smooth operation of large doors.

### **Glazing:**

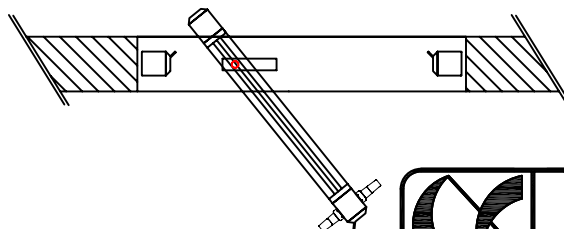

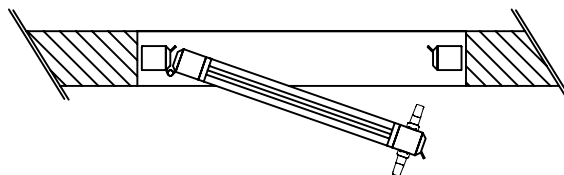

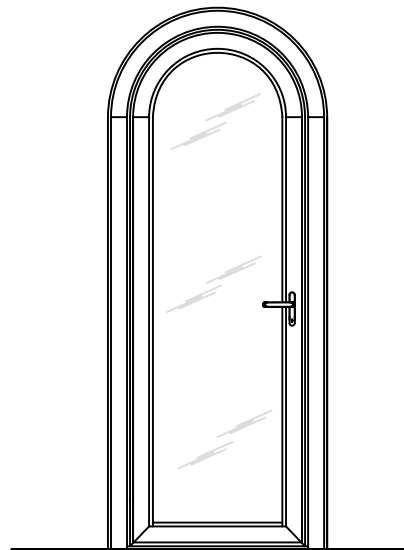

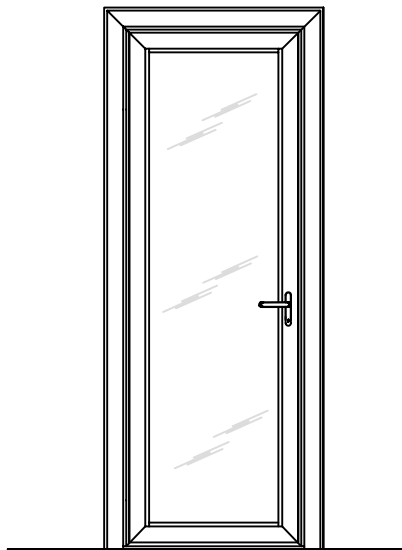

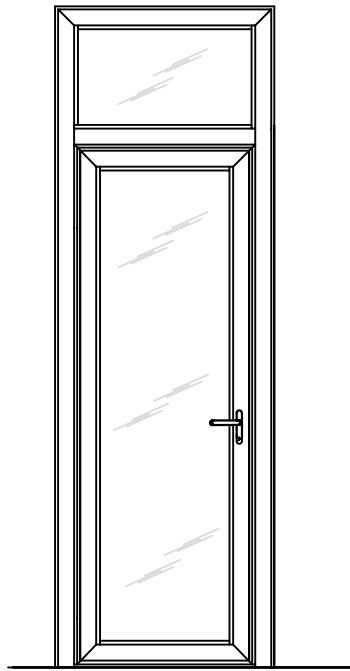

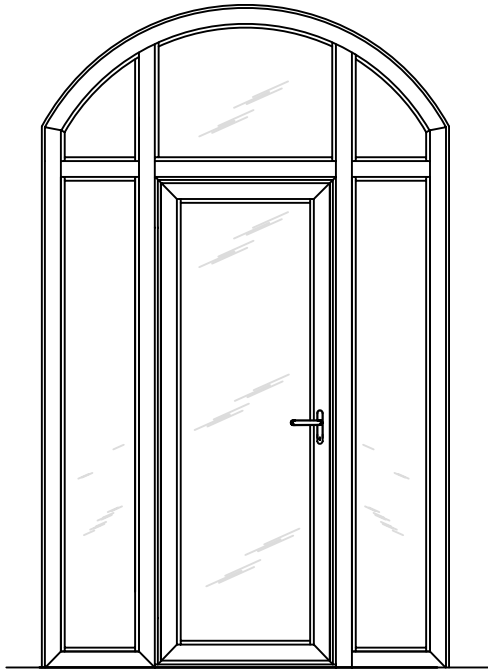

Doors are available with a variety of dividers and mullions. All types of glass are available to meet design and climate needs.

### **Glazing:**

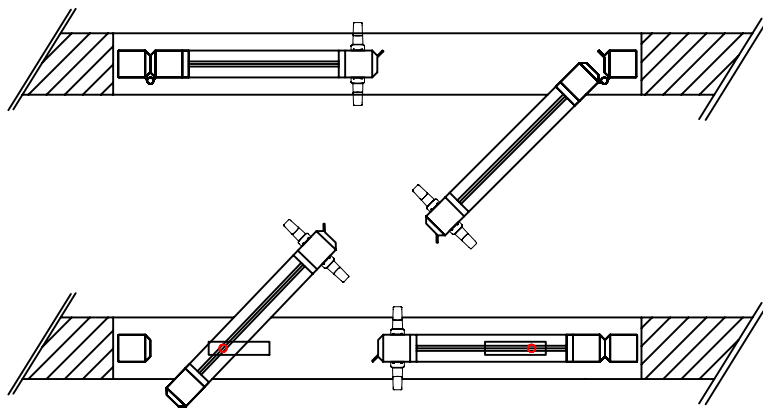

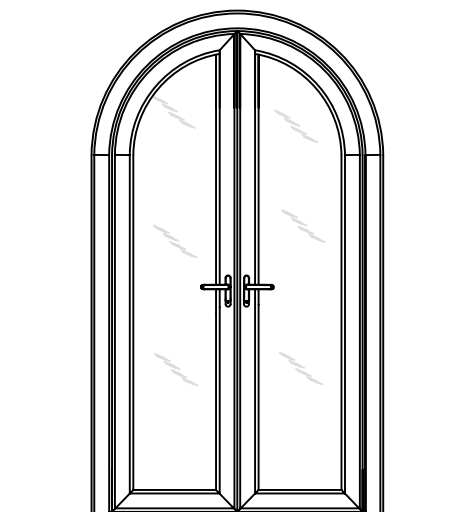

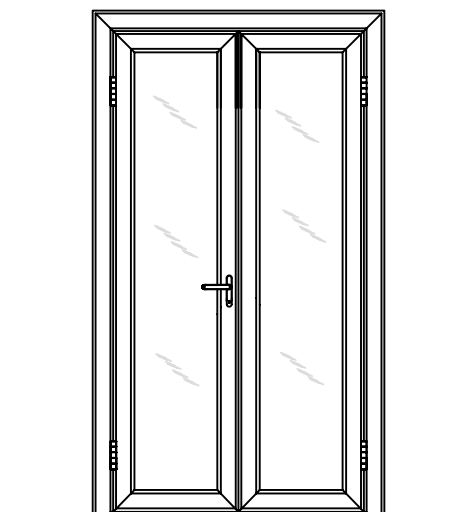

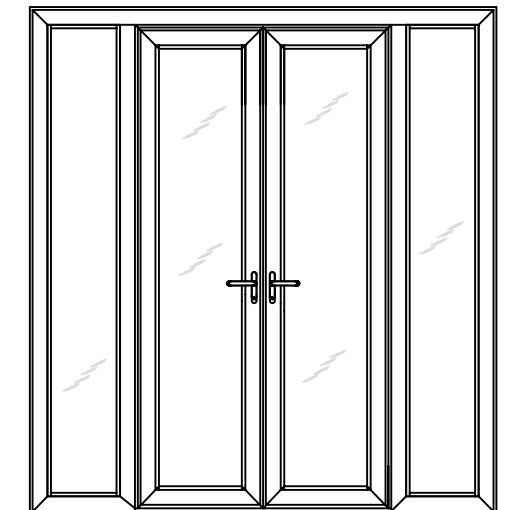

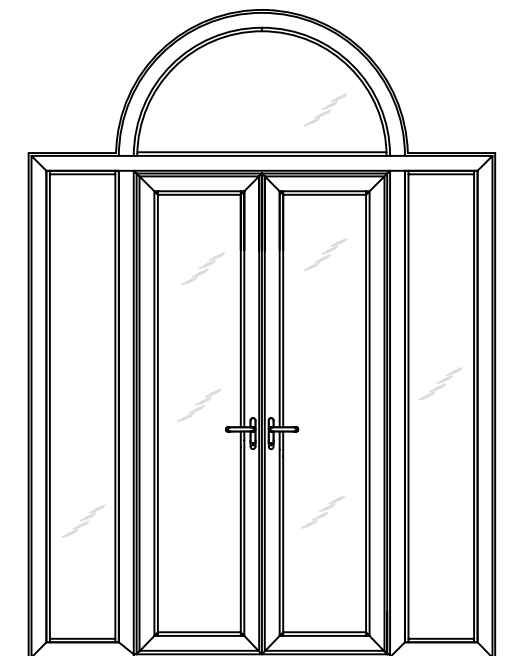

Doors are available with a variety of dividers and mullions. All types of glass are available to meet design and climate needs.

### **Security :**

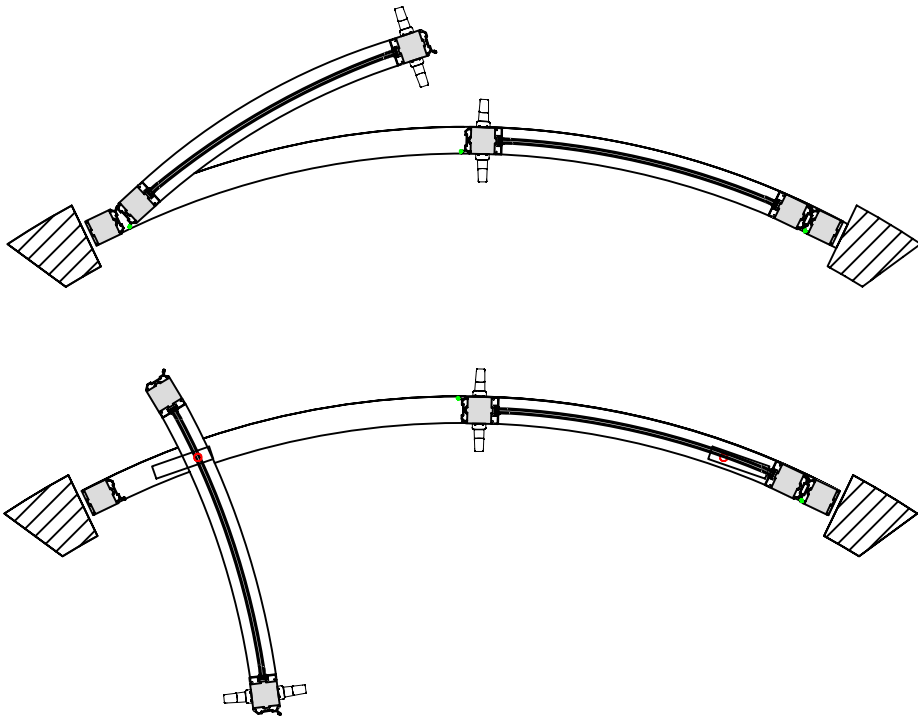

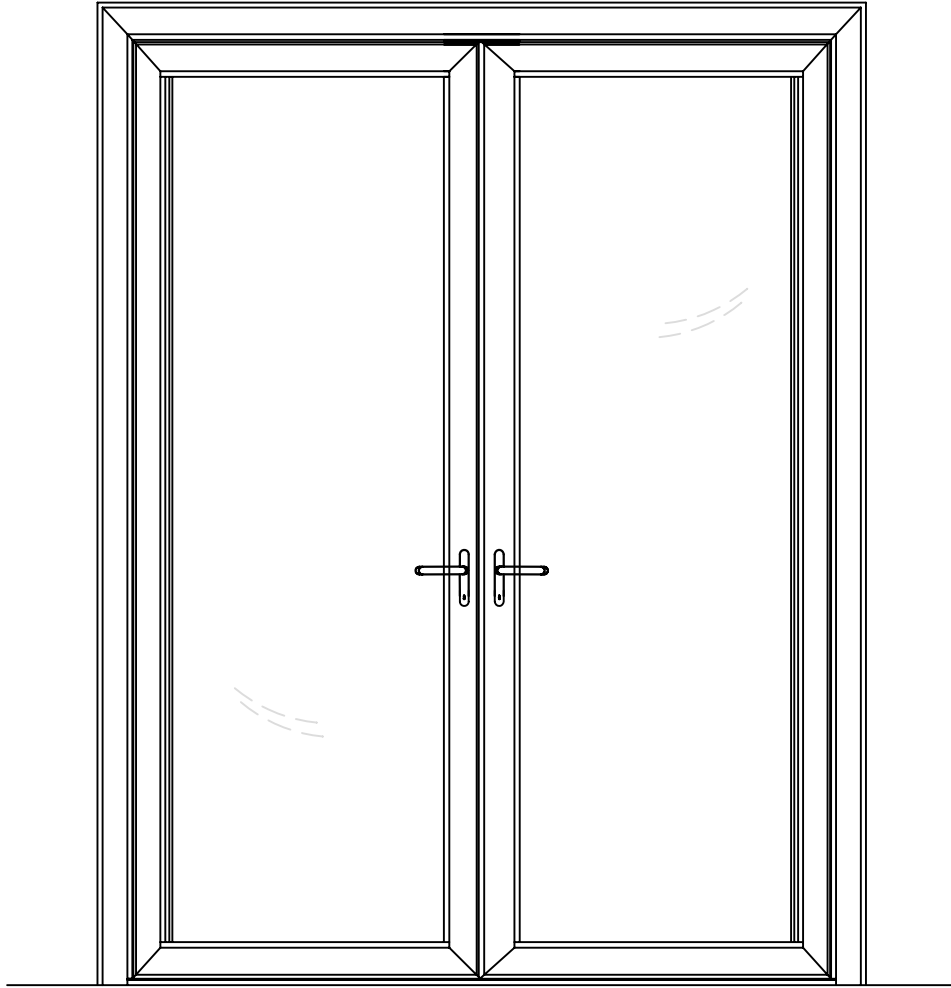

All french doors come standard with stainless steel multi-point locking hardware for maximum security.
